SUMMARY

QA Automation Engineer with 3.5+ years of experience in Automation and Manual Testing of enterprise web applications. Experienced in Playwright, Selenium Web Driver, Java, TestNG, REST Assured, SQL, Jenkins, Maven, Postman, Git, JIRA, and Agile Scrum. Skilled in developing scalable automation frameworks using Page Object Model (POM), API automation, CI/CD integration, database validation, and end-to-end testing. Passionate about improving software quality through automation and continuous testing.

TECHNICAL SKILLS

Programming and Framework: Playwright Automation, Selenium Web Driver, Java (Oops, Collections, Exception Handling), TestNG, REST Assured, JUnit, Maven, Git.

Automation Testing: UI, Automation(Web), API Automation, Page Object Model (POM), Hybrid Automation Framework, Data Driven Framework, Cross Browser Testing, Parallel Test Execution, Headless Execution, Data Driven Testing, CI/CD Integration (Jenkins).

Testing Expertise: Functional Testing, Integration Testing, Regression Testing, Smoke Testing, Sanity Testing, Exploratory Testing, End-to-End Web Application Testing, Mobile Testing (iOS, Android)

API and Database: REST APIs, API Testing (Postman), SQL, Swagger, MySQL

Tools: JIRA, JMeter (Load Testing), GitHub, LoadRunner, BrowserStack, IntelliJ IDEA, Eclipse, VS Code, MS Office.

Methodologies: Agile Scrum Methodology, SDLC, STLC.

WORK EXPERIENCE

Quality Analyst

CMS Computers, Uttar Pradesh, India

Jan 2025 - Present (1.7 years)

- Developed and maintained UI automation test scripts using **Playwright with JavaScript**, improving regression test coverage and reducing manual testing effort.
- Developed 250+ Playwright automation test scripts reducing regression execution time by **65%**.
- Designed and implemented automation frameworks using the **Page Object Model (POM)** for scalable and maintainable test scripts.
- Automated end-to-end business workflows and executed cross-browser testing across Chromium, Firefox, and WebKit browsers.
- Performed API automation and manual API validation using **REST Assured** and **Postman**, validating request/response payloads, status codes, authentication, and error handling.
- Created and executed functional, regression, smoke, sanity, and integration test cases for web applications.
- Performed database validation using **SQL** to verify application data integrity and backend transactions.
- Collaborated with Business Analysts, Developers, and Product Owners to understand requirements and identify automation opportunities.
- Logged, tracked, and verified defects using **Jira**, ensuring timely resolution and successful retesting.
- Participated in Agile ceremonies including sprint planning, backlog grooming, daily stand-ups, sprint reviews, and retrospectives.
- Supported User Acceptance Testing (UAT), production deployment validation, and release verification activities.

Software Test Engineer

AurionPro Solutions, Mumbai, India

May 2022 - Dec 2024 (2.1

years)

- Developed and executed automated test scripts using **Selenium WebDriver with Java** and **TestNG** for web application testing.

- Built reusable automation components using the **Page Object Model (POM)** framework to improve script maintainability.
- Executed functional, regression, smoke, sanity, and end-to-end testing for Loan Origination System (LOS) applications.
- Performed API testing using **Postman** and validated REST APIs by verifying request/response payloads, status codes, and business rules.
- Conducted cross-browser compatibility testing using Chrome, Firefox, and Edge to ensure consistent application behavior.
- Integrated automated test suites with **Maven**, **TestNG**, and **Jenkins** for continuous integration and scheduled executions.
- Validated loan processing workflows, EMI calculations, repayment schedules, overdue scenarios, and transaction records.
- Executed SQL queries for backend database validation and verified data consistency between UI and database.
- Performed load and performance testing using **JMeter** to evaluate application stability under concurrent user load.
- Managed test execution using **TestNG**, generated execution reports, and maintained automation code in **Git** repositories.
- Reported, tracked, and retested defects using **Jira**, collaborating closely with development teams throughout the defect life cycle.
- Participated in requirement analysis, test planning, test estimation, and review meetings within Agile Scrum teams.
- Supported production deployments, performed smoke validation after releases, and ensured application stability.

PROJECTS

• NHAI Data Lake 3.0

Client: NHAI, MoRTH, NHAI-DCL

Organization: CMS Computers Pvt. Ltd.

Duration: Jan 2025 – Present

Project Description:

NHAI Data Lake 3.0 is a government digital platform used for managing national highway projects, contracts, inspections, maintenance activities, GIS-based project monitoring, dashboards, and stakeholder workflows. The application provides centralized data management with role-based access control and mobile integration for field inspections.

Roles & Responsibilities:

- Designed and executed detailed **Test Scenarios**, **Test Cases**, and **Test Data** based on BRD, FRS, and business requirements.
- Performed **Functional**, **Regression**, **Smoke**, **Sanity**, **Integration**, **End-to-End (E2E)**, and **UAT Testing** for web and mobile applications.
- Conducted **API Testing** using **Postman**, validating REST APIs, request/response payloads, authentication, status codes, and error handling.
- Executed **Database Validation** using SQL to verify backend data integrity and business transactions.
- Performed **Mobile Application Testing** on Android and iOS devices, validating field inspection workflows and GIS-based features.
- Executed **Performance Testing** using **JMeter** to validate application performance and response time.
- Verified GIS location-based functionalities, map visualization, project tracking, and inspection modules.
- Logged, tracked, and validated defects using **Jira**, collaborating with development teams for timely resolution.
- Participated in Sprint Planning, Daily Stand-ups, Sprint Reviews, Retrospectives, and Release Validation following **Agile Scrum** methodology.
- Supported Production Deployment, UAT, and Post-Release Smoke Testing.

• Omnifin – Loan Origination System (LOS) & Loan Management System (LMS)

Client: Aditya Birla Finance, Aavas Finance
Organization: AurionPro Solutions Pvt. Ltd.
Duration: May 2022 – Dec 2024

Project Description:

Omnifin is an enterprise Loan Origination and Loan Management platform used by NBFCs to automate the complete loan lifecycle from lead generation to loan closure. The application supports credit verification, approval workflows, EMI calculation, repayment management, foreclosure, and customer servicing.

Roles & Responsibilities:

- Prepared comprehensive **Test Plans, Test Cases, Test Scenarios**, and **Requirement Traceability Matrix (RTM)** based on business requirements.
- Performed **Functional, Regression, Smoke, Sanity, Integration, System, End-to-End (E2E), and User Acceptance Testing (UAT)**.
- Conducted **API Testing** using **Postman** by validating request/response payloads, authentication, status codes, and business validations.
- Executed **Database Testing** using SQL to verify loan records, EMI calculations, repayment schedules, customer details, and transaction history.
- Performed **Cross-Browser Testing** to ensure application compatibility across Chrome, Firefox, and Edge browsers.
- Executed **Performance Testing** using **JMeter** to validate system stability and response time under concurrent user load.
- Validated complete loan workflows including:
 - Lead Creation
 - Deal Creation
 - Customer Onboarding
 - Credit Verification
 - RCU (Risk Containment Unit) Verification
 - Loan Approval Workflow
 - Loan Sanction
 - Repayment Processing
 - Foreclosure
 - Loan Closure
- Identified, logged, tracked, and retested defects using **Jira** throughout the defect lifecycle.
- Followed **Agile Scrum** methodology and actively participated in Sprint Planning, Daily Stand-ups, Sprint Reviews, and Retrospectives.

EDUCATION

Maharishi Dayanand University
Master Of Computer Application (MCA)
Maharishi Dayanand University
Bachelor of Computer Science (BSC CS)
